

Safety Agreement

This workshop provides a hands-on introduction to low-field MRI engineering through the assembly and testing of an open-source educational scanner. Participants will work with basic tools, strong neodymium magnets, and simple electrical components in a guided environment.

While no prior experience is required, it is important to recognize that these materials and activities require careful handling to ensure everyone's safety. The purpose of this safety agreement is to outline key precautions and responsibilities for all participants.

Please read the following statements carefully and confirm your agreement before participating in the workshop.

Full name*

Please read and confirm *

- ☐ I understand that this workshop involves hands-on use of tools (e.g., screwdrivers), neodymium magnets, and basic electrical components.
- ☐ I agree to follow all instructions provided by the facilitators at all times.
- ☐ I will handle tools and materials carefully and use them only as instructed.
- ☐ I understand that neodymium magnets are strong and can cause pinching injuries or damage electronic devices, and I will handle them with caution.
- ☐ I confirm that I will inform the facilitators if I have any medical implants (e.g., pacemaker) or safety concerns before participating.
- ☐ I will not touch electrical connections unless instructed and will ensure all work is supervised.
- ☐ I will keep my workspace organized and report any hazards, discomfort, or injuries immediately.

Do you agree to follow all safety guidelines during the workshop? *

- ☐ Yes
- ☐ No

Thank you for taking part in this session. We appreciate your participation and engagement in learning how to build a low-field MRI scanner. We hope you enjoyed the event and found the training informative and inspiring.
